

Speed with(out) directionWeniger Features und mehr Nutzen ausliefern

Dirk Lehmann, SAP

PUBLIC

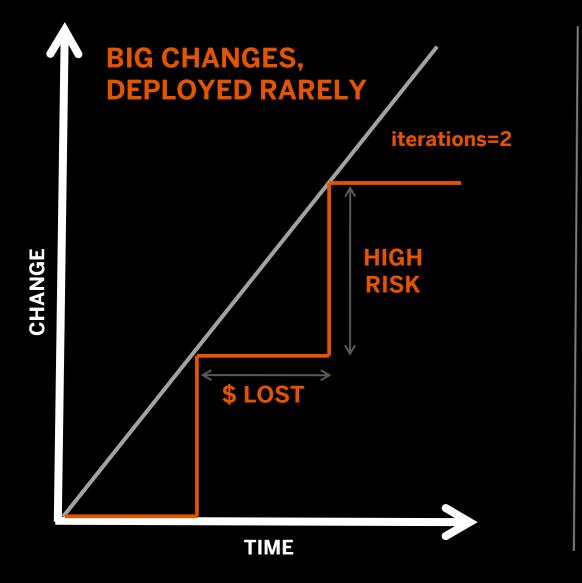

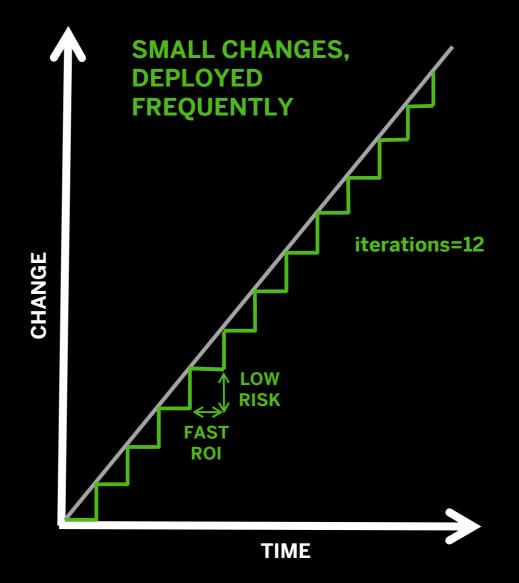

So you wanna go fast?

Faster deployment

The benefits of fast deployment

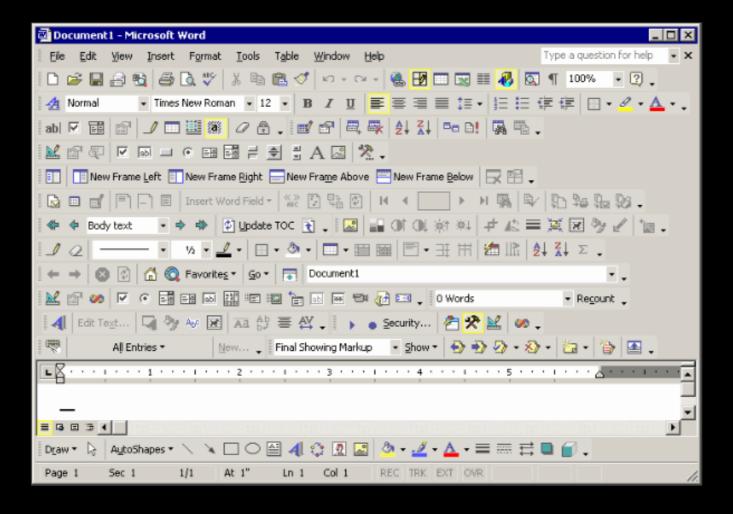

Built-in quality

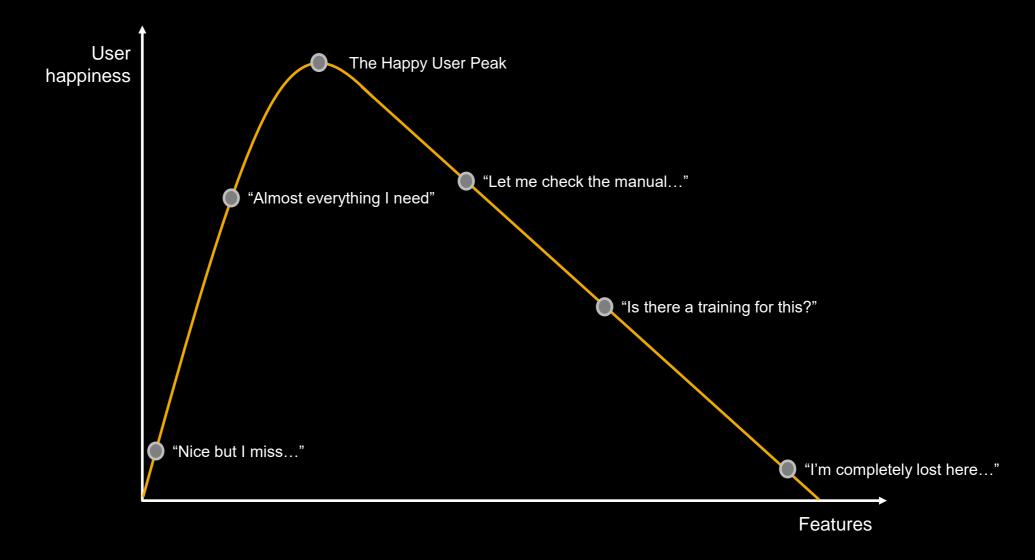

Faster deployment

Feature creep

The feature creep curve

The mother of all software engineering questions

How do we name that variable?

The mother of all software engineering questions

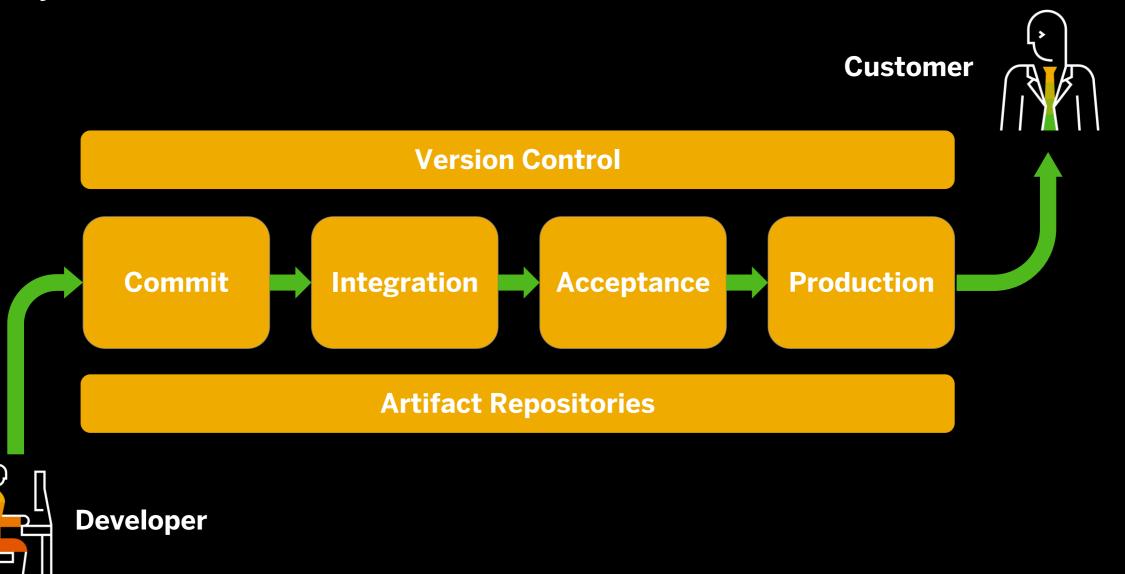

How do we bring value to the customer?

Speed.

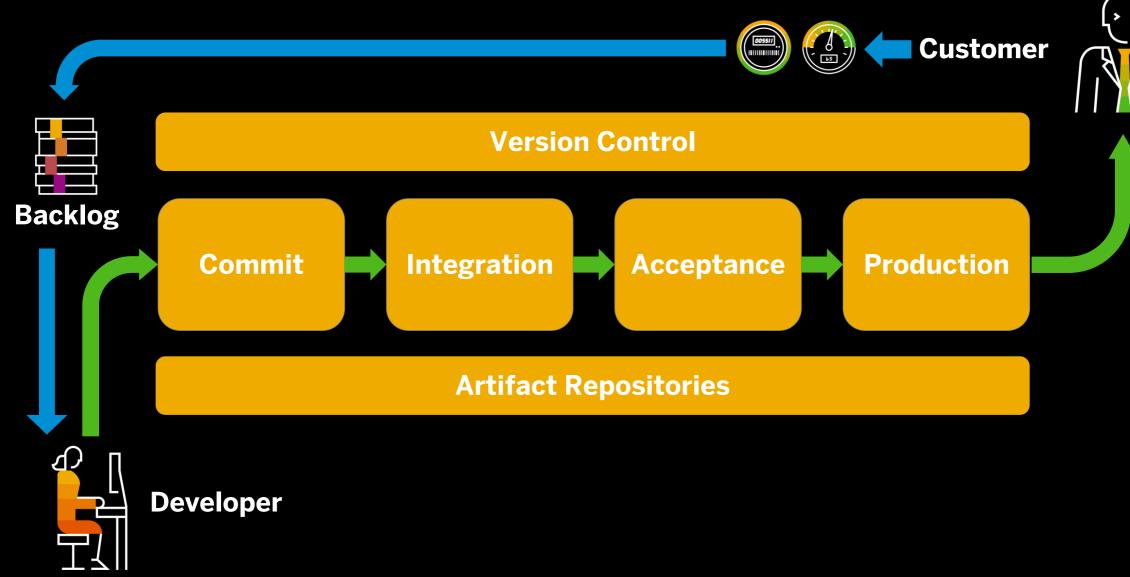

Monty Python: "The Silly Olympics - 100 yards for people with no sense of direction", 1972

Deploy faster

Deploy faster

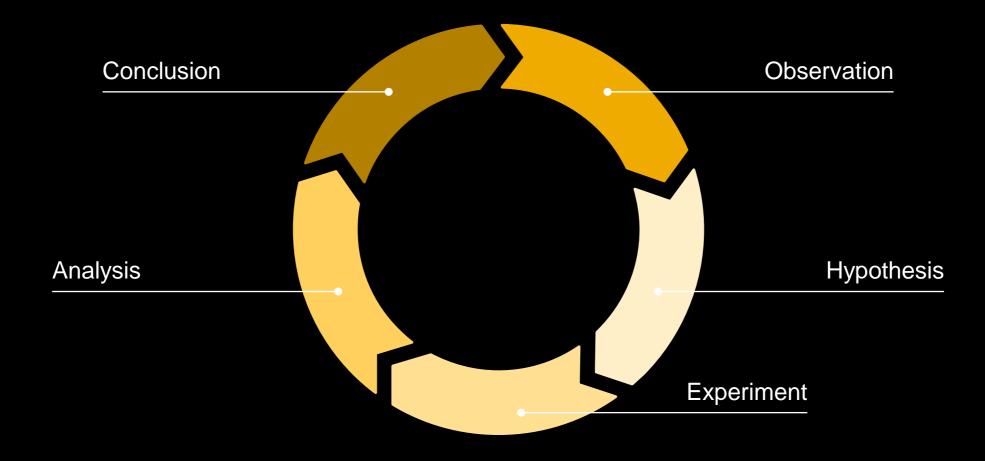

Amplify feedback loop – reworking our backlog

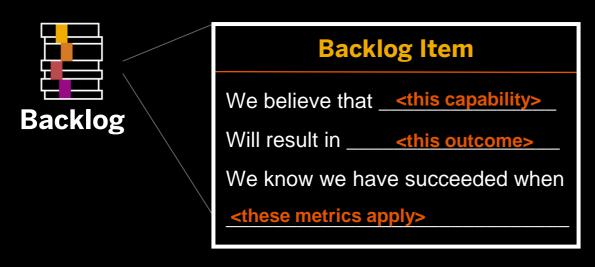

- Based on assumptions
- Could be biased
- Focused on output

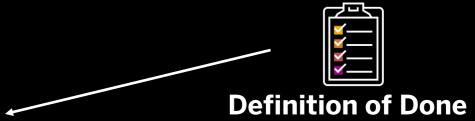

- Output-based metrics
- Detects working software
- Does not detect value

Science.

Hypothesis-driven development (HDD)

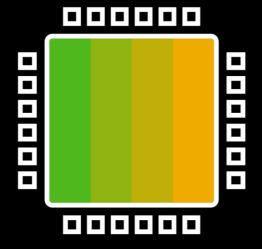

- Based on a hypothesis
- Measurable
- Focused on value

- Needs to be extended to cover value:
 - "Achieved desired outcome"

Measurement.

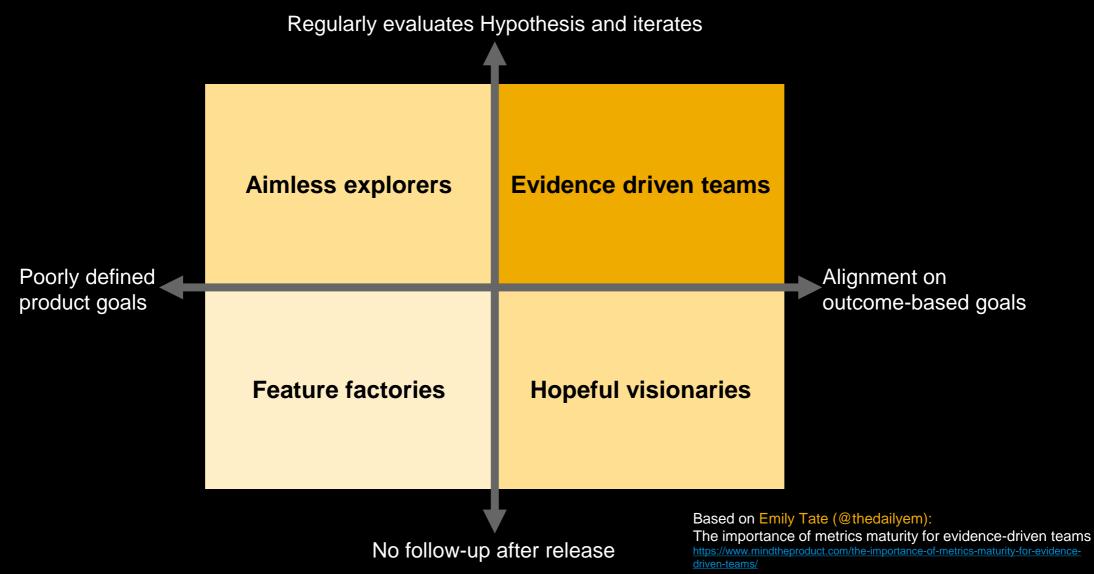

"Without data you're just another person with an opinion."

- W. Edwards Deming

Don't be a feature factory. Become an evidence driven team!

Built-in quality

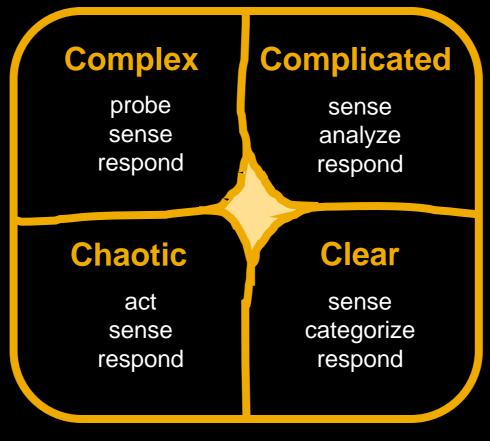

Faster deployment

Faster feedback

When to use Hypothesis Driven Development?

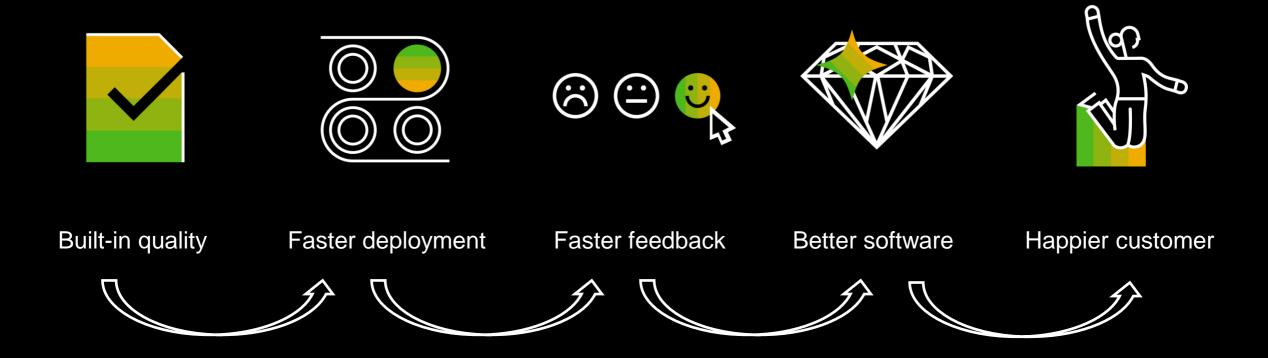

The Cynefin Framework

created by Dave Snowden, 1999

It has always been about value ...

"The goal of Continuous Delivery is better software"

Thank you.
